

APPENDIX:

The Appendix includes the following item(s):

- ☒ - a new or amended Abstract of the Disclosure
- ☐ - a Replacement Sheet for Figure of the drawings
- ☐ - a Substitute Specification and a marked-up copy of the originally-filed specification
- ☐ - a terminal disclaimer
- ☐ - a 37 CFR 1.132 Declaration
- ☐ - a Substitute Specification and a marked-up copy of the originally-filed specification
- ☐ - a verified English translation of foreign priority document

Abstract of the Disclosure

A conveyor of leaves and other products on a belt for laying the same products as a single layer, includes at least a perforated collection belt, at least a suction hood having a surface provided with holes for passage of air flow, an air suction device coupled to the hood, and dragging elements for the collection belt. The collection belt slides by the dragging elements along the perforated surface of the suction hood. The suction device generates an air flow both through the holes of the surface of the suction hood, and through the holes of the collection belt, allowing the coupling on the collection belt of a single layer of the leaves and other products due to their passage close to the collection belt.
